

FlowCCA: Flow-Culture, Creativity & Arts *Sailing Stories Across Borders*

At its core, FlowCCA proposes to reframe the Mediterranean not as a border of separation but as a **shared cultural space of circulation, solidarity, and memory**. The project is to combat structural racism and cultural exclusion through **grounded, community-led action**. By **bridging public debate with grassroots artistic initiatives** across Europe and North Africa, the project builds a **transregional platform for shared creativity, memory, and public dialogue**. The project will operate within the frame of cultural education and Mediterranean cultural exchange. Activities will be presented and implemented as participatory artistic interventions that promote **youth empowerment, cultural exchange, and shared heritage**.
