

# Diversify: Unpacking Anti-racist Education

Diversify aims at promoting **active, intercultural, and antiracist citizenship** by enhancing the **emancipatory and intercultural competencies** of young people, educators and communities while supporting the **decolonization of educational perspectives, combating racism and discrimination** and fostering the creation of **inclusive, fair and just environments**, including schools, reception centres, and the juvenile detention system. In this way, the project has a 360-degree approach, not focusing in one target but in many: local and newly arrived young people, social workers, teachers, detention staff, and indirectly the whole community (through the public initiatives and campaign).
