

# The Game of 7 Discriminations

The project aims to **raise awareness among young people** in Belgium, as well as their supervisors, about the issues of **racism and discrimination**, by providing them with concrete tools to identify, understand, and combat them. Through an **interactive and participatory educational approach**, the project offers a series of **courses on racism** in Belgium and Europe, the co-creation of an **educational tool** with young people of color to deconstruct stereotypes and prejudices, and the active involvement of young people at all stages of the project. The aim is to **strengthen their critical thinking**, civic engagement, and ability to act in favor of a more just and inclusive society.
